

FREE EVALUATION FOR AUTOMATED MONITORING OF VISIBLE EMISSIONS

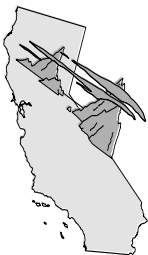

- Are you tired of all the record keeping and paper work associated with weekly monitoring of visible emission from the baghouse, electrostatic precipitator, scrubber or dust collector in your plant?
- Like to avoid uncertainties in manual monitoring in windy or cloudy days
- Like to avoid the cost associated with ongoing manual labor and staff training

Then give us a call, we will conduct free site inspection, provide you with information on the most suitable type of leak detection system (LDS), along with the associated equipment and installation cost. The cost of a leak detection system could be less than the annual cost of staff training and manual monitoring of visible emissions.

If you are interested in getting a free evaluation and a quote for furnishing & installing LDS, please contact Sharie Isles.

To arrange for a free site visit please call Sharie Isles at:
