

AQMD BOILER RULES COMPLIANCE OPTIONS EVALUATION

Per AQMD Rules 1146.1 & 1146.2 all facilities with boilers between 1 to 5 million BTU/Hr of heat input rate need to comply with the new NOX emission limit. The compliance schedule is based on the rating and the number of boilers at each facility. Sierra's engineering staff has provided energy and environmental consulting services to many school districts and colleges through out Southern California. To assist the facility operators in determining the best technically feasible and cost effective option, We are offering a free site inspection and preliminary evaluation to public facilities in Orange County for the following compliance options:

- **Boiler retrofit, or burner replacement**
- **Boiler unit replacement**
- **Exhaust emission control for single boiler unit**
- **Exhaust emission control for multi boiler units, or**
- **Low NOX emission exemption through permit modification**

To make a reservation for the free site inspection, please call Sharie Isles at (949) 833-3455, or fill out the bottom portion of this form and fax it to (949) 833-2970 .
